

COP 26

The United Nations COP26 Climate Summit is taking place in Glasgow, Scotland from 1st—12th November 2021

This is one of the biggest events of its kind ever to be hosted in our country with 200 world leaders expected to attend. There is hope that the event will result in a truly historic agreement to limit greenhouse gas emissions and tackle the climate emergency.

Why Is Climate Change a Problem

Climate change disrupts weather patterns and causes extreme weather events to become more common. These include hurricane activity, droughts and floods.

We can all play our part by going One Step Greener

#OneStepGreener encourages people to take actions that have a positive impact on our environment. Simple steps we can take every day to make life more sustainable and they all add up.
